Objective of the Course:

After independence, we have placed greater emphasis on the growth of our economy. The focus is on growth, both in public and private sectors, so as to cope up with the problems of population explosion. We have found that there is now almost a circle from laissez-faire to welfare state and again back to laissez faire. Adoption of the concept of global economy in the presence of the socialistic perspectives in the Constitution presents a dilemma. The trends of liberalization stating in the early nineties and continuing to this day bring a shift in focus of regulations in diverse fields of economic activities.

This course is designed to acquaint the students of the eco-legal perspectives and implications of such developments.
