No doubt, we have one of the best teachers of University in our Institute - IAS. As we know that there are some international students are also in our class, so most of our teachers delivers the lecture mostly in english. There are many students include me in our class from 115th background, so they are unable to understand lecture in english, no doubt, there is no fault of our teachers. But I am requesting to take an eye on us also, make an arrangement by WAIK both the national and international students to be satisfied.

Suggestions for further improvement of curriculum:

_ Technical courses like Proteins & Proteomics should be diverged into two courses as one of them gives basic knowledge and the other part is analysing the data.

Course specific Internal Assessment could include subjective assignments related to current research in addition to course related content.

In terms of improvement in the overall syllabus, more focus should be placed on the recent developments in Biochemistry related topics (this must be in the syllabus itself).

To ensure interaction in the seminars, polls/ quizzes must be there at the end on platforms like Kahoot.
