**AREAS OF INTEREST:** Bioinformatics, Computational Biology, Systems Biology

## **RESEARCH EXPERIENCE:**

- **Network Pharmacology based Virtual Screening of *Crocus sativus* L. against Ovarian Cancer.**

This study was undertaken to screen the active constituents of *C. sativus* virtually in order to explore their potential effects against the critical genes and pathways involved in the progression of Ovarian cancer using a Network Pharmacology based approach.

- **Autoimmune Lymphoproliferative Syndrome.**

The study was undertaken to understand the genetic mutations in the autoimmune machinery that leads to the progression of Autoimmune Lymphoproliferative Syndrome.
