## About WIS Forum KUK

The Women in STEM (WIS) Forum, KUK was established in 2019 to empower women faculty in Science, Engineering & Technology, Life Sciences, and Mathematics. This forum supports them in advancing their careers and research without obstacles while also guiding them toward available opportunities for future growth. Additionally, the forum serves as a platform to identify challenges faced by women in STEM and propose viable solutions. It actively encourages and mentors female students from schools, undergraduate, and postgraduate programs, fostering scientific temperament and inspiring them to pursue careers in STEM fields. This is achieved through group discussions, interactive sessions, workshops, and lecture series. Now in its 7<sup>th</sup> year (2025-26), the program continues successfully under the leadership of Prof. Anita Bhatnagar, Department of Zoology, KUK (Coordinator), with the invaluable guidance of our esteemed Vice-Chancellor.

## Objectives of Science Carnival

As a nation on the path of progress, we recognize science as a powerful catalyst for both national and global advancement. Science has always been a boon to humanity, transforming lives by introducing countless luxuries and conveniences. It has enabled humankind to reach the moon, explore the depths of the ocean, and uncover the mysteries of both living and non-living worlds. The significance of science in our daily lives cannot be overstated. To celebrate and promote scientific curiosity, we are organizing this **Science Carnival**—a platform to engage with science

in a fun and interactive way with the following Key Objectives:

- To ignite interest in science among the younger generation.
- To encourage scientific and technological creativity, fostering a culture of research and innovation while instilling a sense of pride in students' talents.
- To provide students with opportunities to develop social, moral, and communication skills.
